St. Francis School District Information Technology Curriculum Matrix 2006-2009

Definition

Information and Technology Literacy is the ability of an individual, working independently or with others, to use tools, resources, processes, and systems responsibly to access and evaluate information in any medium, and to use that information to solve problems, communicate clearly, make informed decisions and construct new knowledge. (Taken from Wisconsin's Model Academic Standards for Information and Technology Literacy, 1998.)

Background

The St. Francis School District Information and Technology Literacy Curriculum is aligned with *Wisconsin's Model Academic Standards* for Information and Technology Literacy. This curriculum defines the criteria necessary for students to access, evaluate and utilize information and technology in a unified conceptual framework. This framework is based on the four content standards for information and technology literacy developed in the Wisconsin model.

Integration

The curriculum was designed for all students, PK-12, and **is intended to be integrated into all content areas. This curriculum will be used for the purpose of focusing on learning *with***, rather than *about*, information and technology. In today's society, the emphasis of teaching and learning must be placed on learning how to learn so that students are enabled to be life-long learners and responsible, productive consumers of information.

Mastery

The purpose of the Information and Technology Literacy Curriculum framework is to ensure that students will be provided learning opportunities to assist them in teaching mastery in accordance with the Wisconsin model. The following code will be used in the framework to specify at what grade level material is introduced, reinforced, and mastered.

E = Exposed **D** = Developing **P** = Proficient

Software Applications

The St. Francis School District provides networked software instructional and productivity tools to enable the integration of the Information Literacy Curriculum throughout **all** discipline areas.

A. Media and Technology Content Standard

Students in the St. Francis School District will select and use media and technology to access, organize, create, and communicate information for solving problems and constructing new knowledge, products and systems.
